L. Provider Tax Assessment Reconciliation / Adjustment

An adjustment is necessary to properly reflect the Medicaid and uninsured share of the provider tax assessment for some hospitals. The Medicaid and uninsured share of the provider tax assessment collected is an allowable cost in determining hospital-specific DSH limits and, therefore, can be included in the DSH examination survey. However, depending on how your hospital reports it on the Medicare cost report, an adjustment may be necessary to ensure the cost is properly reflected in determining your hospital-specific DSH limit. For instance, if your hospital removed part or all of the provider tax assessment on the Medicare cost report, the full amount of the provider tax assessment would not have been apportioned to the various payers through the step down allocation process, resulting in the Medicaid and uninsured share being understated in determining the hospital-specific DSH limit. If your hospital needs to make an adjustment for the Medicaid and uninsured share of the provider tax assessment, please fill out the reconciliation below, and submit the supporting general ledger entries and other supporting documentation to Myers and Stauffer, LC along with your hospital's DSH examination surveys.

December 3, 2014 Final Rule Highlights:

- **Medicaid Eligible Individuals:**
 - If an individual is Medicaid eligible for any day during a single inpatient stay for a particular service, always must classify the individual as Medicaid eligible.
 - If an individual is not Medicaid eligible and has a source of third party coverage for all or a portion of the single inpatient stay for a particular service, always cannot include any costs and revenue associated with that particular service when calculating the hospital-specific DSH limit.
 - If an individual has no source of third party coverage for the specific inpatient hospital or outpatient hospital service, always should classify the individual as uninsured and include all costs and revenue associated with the particular service when calculating the hospital-specific DSH limit.
- **Uninsured and Underinsured:**
 - Individuals who have exhausted benefits before obtaining services will be considered uninsured.
 - Individuals who exhaust covered benefits during the course of a service will not be considered uninsured for the particular service. If the individual is not Medicaid eligible and has a source of third party coverage for all or a portion of the single inpatient stay for a particular service, the costs and revenue of the service cannot be included in the hospital-specific DSH limit.
 - Individuals with high deductible or catastrophic plans are considered insured for the service when inpatient when the individual requires the individual to satisfy a deductible and/or share in the overall cost of the hospital services. The cost and revenue associated with these claims cannot be included in the hospital-specific DSH limit.
 - The costs and revenue, including the payments from private insurance for Medicaid eligible individuals, should be included in the calculation of the hospital-specific DSH limit.
- **Scope of Inpatient and Outpatient Hospital Services:**
 - To be considered an inpatient or outpatient hospital service for purposes of Medicaid DSH, the service must meet the federal and state definitions of inpatient or outpatient hospital services and must be included in the state's definition of an inpatient or outpatient hospital service under the approved state plan.
 - FQHC services are not inpatient or outpatient hospital services and cannot be included in the hospital-specific DSH limit.
 - Example: If inpatient services are not covered under the approved state plan, costs associated with inpatient services are not included in calculating the hospital-specific DSH limit.
 - Example: NF, HSA, employed physicians or other licensed practitioners are not recognized as inpatient or outpatient hospital services and are not covered under the inpatient or outpatient hospital Medicaid benefit service categories, and cannot be included in the hospital-specific DSH limit.
 - Administratively necessary days (days awaiting admission) are recognized as inpatient hospital services and should be included in the hospital-specific DSH limit.
- **Timing of Service Specific Determination:**
 - The determination of an individual's status as having a source of third party coverage can occur only once per individual per service provided and applies to the entire claims service.
 - When benefits have been exhausted for individuals with a source of third party coverage, only costs associated with separate services provided after the exhaustion of covered benefits are permitted for inclusion in the calculation of the hospital-specific limit. These services must be a separate service based on the definition of a service for Medicaid (e.g. separate inpatient stay or separate outpatient (day period)).
 - Uncompensated care costs incurred by hospitals due to unpaid copays, co-insurance, or deductibles associated with a non-Medicaid eligible individual cannot be included in the calculation of the hospital-specific DSH limit.
- **Physician Services:**
 - Services that are not inpatient or outpatient hospital services, including physician services, must be excluded when calculating the hospital-specific DSH limit.
 - Exception: Costs where insurance pays an all inclusive rate are allowable.
 - Physician costs under Section 1115 waivers are still excluded from the DSH limit calculation.
- **Prisoners:**
 - Individuals who are inmates in a public institution or are otherwise involuntarily in secure custody as a result of criminal charges are considered to have a source of third party coverage.
- **Indian Health Services:**
 - For Medicaid DSH purposes, American Indian/Alaska Natives are considered to have third party coverage for inpatient and outpatient hospital services received directly from IHS or tribal health programs (direct health care services) and for services specifically authorized under CMS.
 - Determining factor in deciding whether an American Indian or Alaska Native has health insurance is IP or QIP hospital services. If the provider entity is an IHS facility or tribal health program.
 - Contract Services (Non-IHS provided): If the service is specifically authorized via a purchase order or equivalent document, it is considered to be insured. If it does not have an authorization, it is considered an uninsured service.
